Summary

Senior Software Engineer and IIT Kharagpur MBA with 6+ years of experience leading enterprise Generative AI and data modernization initiatives. Architect of agentic AI solutions and large-scale ML migrations, including the transition of 40+ production models from GCP Vertex AI to Snowflake. Delivered \$775K in annual margin impact and reduced migration cycles by 30% using LLM-driven automation. Specializes in LangChain, Snowflake Cortex AI, and Python to convert legacy data platforms into scalable, AI-native, conversational systems

Technical Skills

- **Generative AI:** Agentic AI Architectures | LangChain | RAG | Prompt Engineering | OpenAI | LLaMA | Gemini
- **Machine Learning:** Predictive & Propensity Models (XGBoost, Random Forest, Logistic Regression) | Feature Engineering
- **Data & Cloud:** Snowflake Cortex AI | GCP Vertex AI | Source-to-Target Automation
- **Languages & Tools:** Python | SQL | Streamlit | Power BI | Tableau | Digital Analytics (Omniure, Content Square) | eDiscovery (Relativity, Nuix)

Work Experience

Virtusa

Senior Software Engineer Jan 2025 – Present

- **Spearheaded the migration of 40+ enterprise AI/ML models**, including complex Special Pricing engines, from **GCP (Vertex AI) to Snowflake**, ensuring seamless architectural transition and performance parity.
- **Led Generative AI transformations** to modernize legacy data platforms by automating Source-to-Target mapping and metadata interpretation using **LangChain**, **reducing migration timelines by 30%**.
- **Architected Conversational Analytics** solutions using **Snowflake Cortex AI** and **OpenAI LLMs** to enable Natural Language Query (NLQ)-to-insight experiences for global business stakeholders.
- **Deployed an Agentic GenAI synthetic data framework** that interprets natural language to generate high-fidelity, PII-masked datasets, ensuring statistical integrity and regulatory compliance.
- Engineered an automated testing framework that parses data mapping files to generate test cases and validation scenarios, significantly improving data quality and engineering efficiency.
- Developed propensity and decision intelligence models leveraging ensemble learning (XGBoost, Random Forest), which successfully increased lead conversion rates from **1.3% to 5%**.

Dell Technologies

Senior Analyst June 2022 – Jan 2025

- **Spearheaded a GenAI-powered customer engagement initiative** as an Ideathon winner, proposing AI-driven enhancements to online chat experiences that delivered an estimated **\$775K annual margin uplift**.
- Engineered a **Generative AI chatbot using open-source LLMs (Llama)** to automate promotional email generation, product Q&A, and multilingual translation, significantly improving sales productivity.
- **Developed an automated insights pipeline using Python and LLMs** to analyse Power BI dashboards, generating Week-over-Week (WoW) and Quarter-over-Quarter (QoQ) narrative summaries for stakeholders.
- **Architected self-serve Power BI dashboards** for cross-functional teams, accelerating data consumption and enabling large-scale, data-driven decision-making.
- Optimized revenue through **Cost-Benefit Analysis and coupon effectiveness studies**, identifying high-impact financing offers and promotional strategies.
- Utilized **Customer Journey Analytics (Omniure, Content Square)** to identify digital pain points on Dell.com, proposing actionable improvements to the end-to-end user experience.
- Recognized as **Runner-up in the GenAI Ideathon** for leveraging Llama to analyse customer conversations and extract actionable business insights

Deloitte USI

Solution Delivery Analyst July 2017 – September 2019

- Oversaw the **processing of high-volume electronic data** using industry-standard **eDiscovery tools**, including Relativity and Nuix, to facilitate efficient legal review and data analysis.
- **Automated data workflows** to ensure accuracy and consistency across large-scale litigation support projects.
- **Recognized for excellence with the Spot Award and Star Performer** distinction for consistently exceeding project delivery expectations and technical performance standards

GenAI Portfolio

- **GenAI Content Creator:** Founded and manage a technical YouTube channel focused on LLMs and Generative AI, garnering **10K+ views within 5 months**.
- **Multi-modal AI Applications:** Developed end-to-end applications using Gemini LLMs and Streamlit, including image-based nutrition analysis and automated content summarization tools.
- **Enterprise Chatbot Design:** Built conversational AI assistants demonstrating advanced prompt engineering and RAG patterns for personalized user experiences

EDUCATION

IIT Kharagpur (Vinod Gupta School of Management) Kharagpur

MBA, General Management (GPA: 8.10/10) Graduation Date: May 2022

- **Coordinator, Finterest, VGSoM:** Organize valuation, trading competitions, budget and financial analysis
- **Coordinator, Quiz Club, VGSoM:** Responsible for organizing college and national level quiz events

AWARDS & ACCOMPLISHMENTS

- **Awarded Kaggle Discussion expert** for actively engaging in the Kaggle community
- **Winner of Ideathon 5.0**, a PAG Level event conducted by Dell Technologies
- Secured **runner-up** position in the **GEN AI Ideathon** competition hosted by Dell Technologies by leveraging Llama to analyse customer conversations and extract actionable insights
